

A06B-6096-H105

Industrial automation components

Manufacturer	Fanuc
Catalog number	a06b-6096-h105
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Weight	4.15 kgs
Voltage	283 - 325 V
Horsepower	4.75 KW
Power	4.75 kW
Cooling Capacity	4.75 kW
Product Type	Drive
Signal Type	325
Signal Level	325 V
Relay Specifications	230 VAC

Description

The Fanuc A06B-6096-H105 is a high-performance servo amplifier module designed for precise motion control in industrial automation systems. Manufactured by Fanuc, a leading provider of industrial automation components, this module is part of the Alpha series, known for its reliability and efficiency. The A06B-6096-H105 operates with an input voltage range of 283 to 325 V and delivers a maximum output voltage of 230 V. It provides a rated output current of 18.7 A for the L axis, ensuring robust performance in demanding applications. With a power rating of 4.75 kW, this module is suitable for various industrial machinery requiring precise and reliable motion control. Its compact design and advanced features make it an ideal choice for enhancing the performance and efficiency of automation systems.
