

## A06B-6096-H107

Industrial automation components

<b>Manufacturer</b>	Fanuc
<b>Catalog number</b>	a06b-6096-h107
<b>Category</b>	Industrial automation components
<b>Product type</b>	Industrial automation components
<b>Status</b>	Active product

### Technical specification

<b>Weight</b>	13.61 kgs
<b>Weight</b>	13.61 kg
<b>Input Voltage</b>	200-230 VAC
<b>Power Rating</b>	15 kW
<b>Horsepower</b>	20 HP
<b>Current</b>	115 Amp

### Description

The Fanuc A06B-6096-H107 is a high-performance servo amplifier module from Fanuc's Alpha Series, designed to provide precise and reliable motion control in industrial automation applications. This module is engineered to interface seamlessly with Fanuc's Alpha Series servo motors, delivering exceptional performance and durability. It is particularly suitable for use in CNC machinery, robotics, and other automated systems that require accurate motor control and efficient power management. The A06B-6096-H107 features a robust design capable of withstanding demanding industrial environments, ensuring optimal performance and longevity. Its compact size and efficient cooling system make it an ideal choice for applications where space and thermal management are critical. With its advanced technology and reliable operation, the A06B-6096-H107 contributes to enhanced productivity and precision in various industrial settings.
