

A06B-6096-H116

Industrial automation components

Manufacturer	Fanuc
Catalog number	a06b-6096-h116
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Weight	4.08 kgs
Voltage	283 - 325 V
Current	35 A
Horsepower	7.5 KW
Cooling Capacity	7.5 kW
Measurement Range	283 - 325
Product Type	Module
Relay Specifications	35 A
Power	7.5 kW
Signal Level	325 V

Description

The Fanuc A06B-6096-H116 is a single-axis servo amplifier module from Fanuc's Alpha series, specifically designed for precise industrial motion control applications. Operating with a rated input voltage of 283–325 V DC and delivering a maximum output voltage of 230 V AC, it provides a rated output current of 35 A on the L-axis. This module is ideal for high-demand CNC and automation systems, ensuring reliable and efficient performance. Its compact design, measuring 60 mm in width, 307 mm in depth, and 380 mm in length, allows for flexible integration into various industrial setups. The A06B-6096-H116 is engineered to meet the rigorous demands of modern manufacturing environments, offering enhanced control and stability for complex motion tasks.
