

A06B-6100-H002

Industrial automation components

Manufacturer	Fanuc
Catalog number	a06b-6100-h002
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Frequency	50 - 60 Hz
Product Type	Drive
Signal Type	230
Signal Level	230 V
Voltage	200 - 230 V
Measurement Range	200 - 230

Description

The Fanuc A06B-6100-H002 is a high-performance 6-axis servo drive designed for industrial automation applications, particularly in robotic systems. Manufactured by Fanuc, a leading provider of automation solutions, this servo drive offers precise motion control and energy efficiency. It operates within an AC voltage range of 200 to 230 V and supports frequencies from 50 to 60 Hz, making it suitable for various industrial environments. The A06B-6100-H002 is engineered to handle six axes of motion, providing comprehensive control for complex robotic operations. Its robust design ensures reliable performance in demanding conditions, contributing to enhanced productivity and operational efficiency in automation processes.
