

A06B-6100-H004

Industrial automation components

Manufacturer	Fanuc
Catalog number	a06b-6100-h004
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Frequency	50 - 60 Hz
Product Type	Drive
Signal Type	230
Voltage	200 - 230 V
Measurement Range	200 - 230
Signal Level	230 V

Description

The Fanuc A06B-6100-H004 is a 6-axis servo amplifier designed for Fanuc robotic systems, particularly those utilizing the R3 controller. This unit is engineered to provide precise motion control and energy efficiency, ensuring optimal performance in industrial automation applications. Key features include a voltage range of 200-230 V AC, supporting frequencies of 50-60 Hz, and a signal level of 230 V. The A06B-6100-H004 is compatible with various Fanuc robot models, offering reliable and efficient control for complex robotic tasks.
