

A06B-6102-H130#H520

Industrial automation components

Manufacturer	Fanuc
Catalog number	a06b-6102-h130h520
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Weight	13.15 kgs
Product Type	Spindle Amplifier Module
Product Series	Alpha Series
CE Approval	Yes
Matching Motor Rating	30 kW
Application Area	CNC Machine-Tool Spindle Motor Control

Description

The Fanuc A06B-6102-H130#H520 is a high-performance spindle amplifier module designed for precise control of CNC machine-tool spindle motors. Part of Fanuc's Alpha Series, this module is engineered to deliver reliable and efficient operation in demanding industrial environments. It is CE approved, ensuring compliance with European safety standards. The A06B-6102-H130#H520 is compatible with a 30 kW motor, providing robust power handling capabilities. This module is suitable for applications requiring precise spindle speed regulation and robust industrial duty. Its design emphasizes durability and high performance, making it a valuable component for enhancing machining operations.
