

## A06B-6110-H011

Industrial automation components

<b>Manufacturer</b>	Fanuc
<b>Catalog number</b>	a06b-6110-h011
<b>Category</b>	Industrial automation components
<b>Product type</b>	Industrial automation components
<b>Status</b>	Active product

### Technical specification

<b>Weight</b>	3.08 kgs
<b>Manufacturer</b>	Fanuc
<b>Voltage</b>	200 - 240 V
<b>Current</b>	49 A
<b>Product Type</b>	Converter
<b>Signal Level</b>	240 V
<b>Power</b>	13.2 kW
<b>Frequency</b>	50 - 60 Hz
<b>Horsepower</b>	13.2 KW
<b>Cooling Capacity</b>	13.2 kW
<b>Measurement Range</b>	283 - 339
<b>Signal Type</b>	240
<b>Relay Specifications</b>	240 VAC

### Description

The Fanuc A06B-6110-H011 is a power supply module designed for industrial automation applications, particularly within Fanuc's ALPHA i series. This module operates with a 200-240 V AC input and delivers a 283-339 V DC output, providing a rated power of 13.2 kW. It is engineered to support smaller Fanuc ALPHA i Servo systems and machines requiring 200 V 3-phase power. The A06B-6110-H011 is part of the first generation of Fanuc Alpha i modules, known for their efficiency and performance. This power supply module is suitable for applications where precision and control are paramount, ensuring reliable operation in various industrial settings.
