

A06B-6112-H002#H550

Industrial automation components

Manufacturer	Fanuc
Catalog number	a06b-6112-h002h550
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Weight	3.63 kgs
Product Type	Spindle Amplifier Module
Product Series	ALPHA i
Model Number	SPM-2.2i
Manufacturer	Fanuc
Input Voltage	200 V AC
Output Voltage	240 V AC
Output Current	13 A
Dimensions	2.5 x 11.5 x 3.0 inches
Weight	5.4 kg

Description

The Fanuc A06B-6112-H002#H550 is an ALPHA i Spindle Module Model SPM-2.2i, designed to enhance the performance of industrial machinery. Manufactured by Fanuc, a leading provider of automation solutions, this spindle amplifier module is engineered for high precision and reliability in various industrial applications. The A06B-6112-H002#H550 model is part of Fanuc's ALPHA i series, known for its advanced technology and efficient operation. This module is suitable for controlling spindle motors in CNC machines, ensuring smooth and accurate machining processes. Its robust design and advanced features make it a valuable component for industries requiring high-performance spindle control. The module is available for purchase and repair services, providing flexibility for customers seeking to maintain or upgrade their equipment.
