### Description

The Fanuc A06B-6114-H104 is a single-axis servo amplifier module from Fanuc's ALPHA i series, designed for precise motion control in industrial applications. Operating with a 200VAC input, it delivers a 4.5 kW output at 240 V and 13 A, ensuring efficient power conversion. This module is engineered for reliability and performance, making it suitable for various automation systems. Its compact design facilitates easy integration into existing setups, and it has been rigorously tested under maximum rated load to ensure optimal functionality. Whether you're looking to replace a faulty unit or upgrade your system, the A06B-6114-H104 offers a robust solution for your automation needs.
