

A06B-6114-H105

Industrial automation components

Manufacturer	Fanuc
Catalog number	a06b-6114-h105
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Weight	3.37 kgs
Voltage	283 - 339 V
Power	5.5 kW
Cooling Capacity	5.5 kW
Product Type	Drive
Current	19 A
Horsepower	5.5 KW
Signal Type	339
Signal Level	339 V
Relay Specifications	240 VAC

Description

The Fanuc A06B-6114-H105 is a high-performance servo amplifier module from Fanuc's ALPHA i series, designed to provide precise and reliable motion control in industrial automation systems. This module is engineered to work seamlessly with Fanuc's servo motors, ensuring optimal performance in various applications such as CNC machines, robotics, and other automated machinery. Key features include a rated input voltage of 283-339 VDC, a rated output current of 19 A, and a power rating of 5.5 kW. The module operates with an output voltage of 200-240 VAC and supports an output frequency range from 0.1 to 800 Hz, making it suitable for a wide range of industrial applications. With a compact design and robust construction, the A06B-6114-H105 ensures durability and longevity, even in demanding environments. Its advanced features and compatibility with Fanuc's servo motors make it an ideal choice for enhancing the performance and efficiency of industrial automation systems.
