

A06B-6115-H001

Industrial automation components

Manufacturer	Fanuc
Catalog number	a06b-6115-h001
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Weight	1.91 kgs
Frequency	50 - 60 Hz
Measurement Range	200 - 240
Product Type	Converter
Signal Level	240 V
Voltage	200 - 240 V

Description

The Fanuc A06B-6115-H001 is an ALPHA i Power Supply Module designed for industrial automation applications. This module serves as a main power supply for motor power and provides control power to servo amplifiers, ensuring efficient operation of CNC systems. It operates with an input voltage of 200-240V, 50/60Hz, 3-phase, and delivers an output voltage of 283-339V, with a power capacity of 1.25 kW. The module is part of the FANUC α i PS series, known for their reliability and performance in demanding industrial environments. The A06B-6115-H001 is compatible with various FANUC servo systems, making it a versatile choice for enhancing the performance and reliability of CNC machinery. Its robust design and high-quality components ensure long-term durability and minimal maintenance requirements, making it a valuable component for industrial automation systems.
