

A06B-6117-H207

Industrial automation components

Manufacturer	Fanuc
Catalog number	a06b-6117-h207
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Weight	4.44 kgs
Voltage	283 - 339 V
Measurement Range	283 - 339
Signal Level	339 V
Weight	2.5 lbs
Product Type	2-Axis Servo Amplifier Module
Manufacturer	Fanuc
Part Number	A06B-6117-H207
Category	Podzespoły automatyki przemysłowej

Description

The Fanuc A06B-6117-H207 is a high-performance 2-axis servo amplifier module from Fanuc's ALPHA i series, specifically the AiSV-40/40 model. Designed for precise and efficient control in industrial automation systems, this module is ideal for applications requiring coordinated motion control, such as robotics, CNC machines, and automated manufacturing systems. Key features include a dual-axis configuration, ALPHA i servo technology for superior performance and accuracy, and compatibility with incremental encoders for enhanced positional feedback. The module's design ensures seamless integration with existing control systems, making it a reliable choice for optimizing production processes.
