

A06B-6117-H303

Industrial automation components

Manufacturer	Fanuc
Catalog number	a06b-6117-h303
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Weight	2.59 kgs
Power	7.5 kW
Product Type	Drive
Voltage	283 - 339 V
Horsepower	7.5 KW
Cooling Capacity	7.5 kW
Measurement Range	283 - 339
Signal Level	339 V

Description

The Fanuc A06B-6117-H303 is a high-performance three-axis servo amplifier module from Fanuc's ALPHA i series, specifically the AiSV-20/20/20 model. Designed for precise motion control in CNC and automated systems, it operates with an input voltage range of 283–339 VDC and outputs 200–240 VAC, delivering consistent current to each axis for synchronized performance. This module is engineered for reliability and industrial duty, integrating seamlessly with Fanuc controllers to support complex multi-axis motion tasks. Its compact design and robust construction make it suitable for various industrial applications requiring precise and reliable motion control.
