

A06B-6121-H011#H550

Industrial automation components

Manufacturer	Fanuc
Catalog number	a06b-6121-h011h550
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Weight	2.47 kgs
Product Type	Spindle Amplifier Module
Matching Motor Rating	11 kW
Drive Width	90 mm
Voltage	400V
Spindle Sensor Inputs	1 input

Description

The Fanuc A06B-6121-H011#H550 is an ALPHA i Spindle Amplifier Module (SPM-11HVi) designed for high-performance industrial applications. Manufactured by Fanuc, a leader in automation technology, this module is part of the A06B-6121 series, known for its reliability and advanced features. It is compatible with 11 kW motors and features a drive width of 90 mm, making it suitable for various machinery requiring precise spindle control. The module operates at a voltage of 400V, aligning with the Alpha i Series HV standards. Its compact design ensures efficient space utilization in control panels. This spindle amplifier module is ideal for enhancing the performance and precision of CNC machines and other automated systems, ensuring optimal operation in demanding industrial environments.
