

## A06B-6122-H015#H550

Industrial automation components

<b>Manufacturer</b>	Fanuc
<b>Catalog number</b>	a06b-6122-h015h550
<b>Category</b>	Industrial automation components
<b>Product type</b>	Industrial automation components
<b>Status</b>	Legacy / discontinued

### Technical specification

<b>Weight</b>	6.80 kgs
<b>Horsepower</b>	17.5 KW
<b>Product Type</b>	Drive
<b>Power</b>	17.5 kW
<b>Cooling Capacity</b>	17.5 kW

### Description

The Fanuc A06B-6122-H015#H550 is an advanced spindle amplifier module designed for high-precision control in CNC machining centers. Part of Fanuc's ALPHA i series, this module is engineered to deliver stable and accurate spindle control for motors rated approximately at 15 kW. Operating on a 400 VAC system, it ensures consistent performance and reliability, making it suitable for both new installations and the refurbishment of legacy equipment. The module's design emphasizes ease of integration, allowing for straightforward installation and maintenance. Its robust construction and high-quality components contribute to its longevity and dependable operation in demanding industrial environments. This spindle amplifier module is ideal for applications requiring precise spindle control, such as milling, turning, and other machining processes where accuracy and stability are paramount.
