

## A06B-6124-H103

Industrial automation components

<b>Manufacturer</b>	Fanuc
<b>Catalog number</b>	a06b-6124-h103
<b>Category</b>	Industrial automation components
<b>Product type</b>	Industrial automation components
<b>Status</b>	Active product

### Technical specification

<b>Weight</b>	5.44 kgs
<b>Weight</b>	5.44 kg
<b>Input Voltage</b>	400 VAC
<b>Model</b>	SVM1-20HVi
<b>Series</b>	Alpha i Series
<b>Application</b>	Industrial Automation Systems

### Description

The Fanuc A06B-6124-H103 is a high-performance servo amplifier module from Fanuc's Alpha i Series, designed to deliver precise control and reliable operation in industrial automation systems. This single-axis amplifier operates on a 400VAC input, making it suitable for various applications requiring robust and efficient motion control. The model SVM1-20HVi indicates its compatibility with Fanuc's advanced servo motors, ensuring seamless integration and optimal performance. With a weight of approximately 5.44 kg, the A06B-6124-H103 is engineered for durability and longevity, meeting the rigorous demands of industrial environments. Its compact design allows for easy installation and maintenance, contributing to reduced downtime and increased productivity. This servo amplifier module is ideal for use in CNC machines, robotics, and other automated systems where precision and reliability are paramount.
