

A06B-6127-H206

Industrial automation components

Manufacturer	Fanuc
Catalog number	a06b-6127-h206
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Weight	7.86 kgs
Horsepower	4.5 KW
Measurement Range	565 - 679
Voltage	565 - 679 V
Power	4.5 kW
Cooling Capacity	4.5 kW
Product Type	Drive
Signal Level	679 V

Description

The Fanuc A06B-6127-H206 is a dual-axis servo amplifier module from the ALPHA i series, designed for precise motion control in industrial automation applications. Operating at an input voltage of 400V, it delivers a continuous power output of 4.5 kW, suitable for demanding tasks requiring high performance and reliability. This module is engineered to control two axes simultaneously, providing efficient and synchronized motion control. Its robust construction ensures durability and consistent operation in various industrial environments. The A06B-6127-H206 is compatible with Fanuc's CNC systems, making it an ideal choice for applications such as CNC machinery, robotic arms, and other automated systems where precise and reliable motion control is essential.
