

## A06B-6127-H208

Industrial automation components

<b>Manufacturer</b>	Fanuc
<b>Catalog number</b>	a06b-6127-h208
<b>Category</b>	Industrial automation components
<b>Product type</b>	Industrial automation components
<b>Status</b>	Active product

### Technical specification

<b>Weight</b>	4.14 kgs
<b>Power</b>	8.6 kW
<b>Measurement Range</b>	565 - 679
<b>Signal Level</b>	679 V
<b>Voltage</b>	565 - 679 V
<b>Horsepower</b>	8.6 KW
<b>Cooling Capacity</b>	8.6 kW
<b>Product Type</b>	Drive

### Description

The FANUC A06B-6127-H208 is a dual-axis servo amplifier module from FANUC's ALPHA iSV series, specifically designed for precise control in CNC applications. This module operates with an input voltage range of 565 to 679 V and delivers a maximum output voltage of 480 V, ensuring compatibility with various industrial systems. With a power rating of 8.6 kW, it provides robust performance for demanding automation tasks. The A06B-6127-H208 is engineered to manage two axes simultaneously, enhancing the complexity and precision of CNC operations. It is suitable for a wide range of industrial applications, including advanced machining and CNC milling, where high-performance motion control is essential. This servo amplifier module is recognized for its reliability and efficiency, making it a valuable component in modern industrial automation systems.
