

A06B-6127-H209

Industrial automation components

Manufacturer	Fanuc
Catalog number	a06b-6127-h209
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Weight	5.90 kgs
Product Type	Dual-Axis Servo Amplifier Module
Input Voltage Range	565–679 V
Power Rating	11.6 kW
Maximum Output Voltage	480 V
Rated Output Current	18.2 A
Dimensions	90 mm x 400 mm x 350 mm
Weight	8.00 kg

Description

The Fanuc A06B-6127-H209 is a dual-axis servo amplifier module from Fanuc's Alpha i series, specifically designed for precise control in industrial automation applications. This module operates within a rated input voltage range of 565–679 V and delivers a power rating of 11.6 kW, with a maximum output voltage of 480 V. It provides a rated output current of 18.2 A for both the L-axis and M-axis, ensuring reliable performance in demanding environments. The module's compact dimensions (90 mm in height, 400 mm in length, and 350 mm in width) and weight of 8.00 kg make it suitable for integration into various industrial systems. For detailed specifications and compatibility information, refer to the manufacturer's datasheet.
