

A06B-6140-H026

Industrial automation components

Manufacturer	Fanuc
Catalog number	a06b-6140-h026
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Weight	7.71 kgs
Signal Type	200
Signal Level	200 V
Voltage	200 V
Product Type	Converter
Relay Specifications	200 VAC

Description

The Fanuc A06B-6140-H026 is a high-performance power supply module from Fanuc's Alpha I series, designed to provide reliable and efficient power to servo amplifiers and CNC control systems in industrial machinery. Operating within a 3-phase system, it accommodates input voltages ranging from 200 to 240 V and supports both 50 Hz and 60 Hz frequencies. With a power rating of 29.8 kW and an input current of 106 A at 200 V, this module ensures consistent and stable power delivery for demanding applications. Its compact design allows for easy integration into existing systems, making it suitable for various industrial settings, including CNC machine tools, robotic systems, and other automation processes requiring dependable power supply. The A06B-6140-H026 is engineered for durability and longevity, capable of withstanding harsh industrial environments and minimizing downtime. Its efficient performance and robust construction make it a valuable component in maintaining the operational efficiency of automated systems.
