

A06B-6200-H037

Industrial automation components

Manufacturer	Fanuc
Catalog number	a06b-6200-h037
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Weight	9.07 kgs
Voltage	200 - 240 V
Horsepower	44 KW
Measurement Range	200 - 240
Product Type	Converter
Current	154 A
Power	44 kW
Cooling Capacity	44 kW
Signal Level	240 V
Relay Specifications	154 A

Description

The Fanuc A06B-6200-H037 is a high-capacity power supply module designed for demanding industrial automation applications. Operating within a 200–240 V AC three-phase input range, it delivers a regulated DC output of 283–339 V, with a rated output power of 44 kW. This module is engineered to provide stable and reliable power to Fanuc servo amplifier systems, ensuring optimal performance in CNC and motion control environments. Its robust construction and defined operating temperature range make it suitable for long-term use in manufacturing, machining centers, and automated production lines.
