

A06B-6250-H060

Industrial automation components

| | |
|-----------------------|----------------------------------|
| Manufacturer | Fanuc |
| Catalog number | a06b-6250-h060 |
| Category | Industrial automation components |
| Product type | Industrial automation components |
| Status | Active product |

Technical specification

| | |
|-----------------------------------|-----------|
| Weight | 9.48 kgs |
| Product Type | Converter |
| Signal Level | 400 V |
| Input Voltage | 400V AC |
| Output Power | 60 kW |
| Product Series | ALPHA i |
| Model | AiPS-60HV |
| Compatible Control Systems | 0iD, 0iF |

Description

The Fanuc A06B-6250-H060 is a high-performance power supply module designed for industrial automation applications. Manufactured by Fanuc, a leading provider of automation solutions, this module is part of the ALPHA i series, specifically the AiPS-60HV model. It operates with an AC input voltage of 400V, delivering a robust output suitable for demanding industrial environments. The module is engineered to provide reliable power to various industrial applications, ensuring consistent performance and efficiency. Its durable construction and advanced features make it a valuable component for enhancing the reliability and efficiency of industrial automation systems.
