

A06B-6290-H104

Industrial automation components

Manufacturer	Fanuc
Catalog number	a06b-6290-h104
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Weight	4.08 kgs
Product Type	Servo Amplifier Module
Product Series	ALPHA iSV
Input Voltage	400 V AC
Output Voltage	240 V AC
Output Current	13 A

Description

The Fanuc A06B-6290-H104 is a high-performance servo amplifier module from Fanuc's ALPHA iSV series, designed to deliver precise control and reliable operation in industrial automation systems. This module is engineered to work seamlessly with Fanuc's advanced CNC systems, ensuring optimal performance in demanding applications. Key features include a robust design for enhanced durability, compatibility with various Fanuc servo motors, and efficient power management for energy savings. The A06B-6290-H104 is suitable for a wide range of industrial applications, including CNC machinery, robotics, and automated production lines, where precise motion control and system reliability are paramount.
