Manufacturer	Fanuc
Catalog number	a16b-2100-0200-r
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Manufacturer	Fanuc
Part Number	A16B-2100-0200-R
Product Type	PCB Control Circuit
Product Series	A16B-2100
Axis Support	6-axis
Application Area	Industrial Automation

Description

The Fanuc A16B-2100-0200-R is a high-performance PCB control circuit designed for Fanuc's 6-axis servo drive systems. This component ensures precise and reliable operation in demanding industrial automation environments.

As part of the A16B-2100 series, it offers compatibility and seamless integration with various Fanuc servo drive modules. The A16B-2100-0200-R is engineered to meet the rigorous standards of modern manufacturing processes, providing efficiency and accuracy in motion control applications.

Its robust design and quality construction make it a dependable choice for maintaining optimal performance in automation systems.
