

## A16B-2200-0430

Industrial automation components

<b>Manufacturer</b>	Fanuc
<b>Catalog number</b>	a16b-2200-0430
<b>Category</b>	Industrial automation components
<b>Product type</b>	Industrial automation components
<b>Status</b>	Active product

### Technical specification

<b>Weight</b>	0.13 kgs
<b>Weight</b>	0.64 lbs
<b>Product Type</b>	Remote I/O Motherboard
<b>Product Series</b>	A16B-2200
<b>Manufacturer</b>	Fanuc
<b>Part Number</b>	A16B-2200-0430
<b>Category</b>	Podzespoły automatyki przemysłowej

### Description

The Fanuc A16B-2200-0430 is a Remote I/O (RIO) Motherboard, integral to Fanuc's industrial automation systems. Designed for seamless communication between various system components, this PCB ensures efficient data transfer and system reliability. Its robust construction and high-quality design make it suitable for demanding industrial environments. The A16B-2200-0430 is part of Fanuc's A16B-2200 series, known for their durability and performance. This motherboard is compatible with specific Fanuc control systems, enhancing their functionality and operational efficiency. For detailed specifications and compatibility information, refer to the manufacturer's datasheet or consult with authorized Fanuc distributors.
