

A20B-2100-0770

Industrial automation components

Manufacturer	Fanuc
Catalog number	a20b-2100-0770
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Weight	0.57 kgs
Product Type	Operator Panel PCB
Controller Compatibility	FANUC R-J3iB
Mounting Location	Interior door of operator panel
Integrated Components	E-stop button, hour meter, LEDs
Fuse Specification	Dual 1A fuses
Mounting Hardware Inclusion	Steel plate mounting

Description

The Fanuc A20B-2100-0770 is an Operator Panel PCB designed for integration with the FANUC R-J3iB controller. This component serves as the interface between the operator and the machine, facilitating control and monitoring functions. It is mounted on the interior door of the operator panel and connects to various peripherals, including the teach pendant, safety devices, and indicator lights. The PCB includes integrated components such as an emergency stop (E-stop) button, hour meter, and LEDs, ensuring comprehensive control and monitoring capabilities. It supports dual 1A fuses for protection and is equipped with a steel mounting plate for secure installation. The A20B-2100-0770 is compatible with the FANUC R-J3iB controller, ensuring seamless integration and reliable performance. This component is essential for maintaining the functionality and safety of FANUC-controlled machinery.
