Ask about this product

Manufacturer	Fanuc
Catalog number	a20b-8200-0991
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Product Type	MAIN PCB A2
Product Series	A20B-8200
Product Type	Main Board
Compatible Systems	Fanuc 31i-B Series
Interfaces	FSSB, MDI, RS-232C, Ethernet

Description

The Fanuc A20B-8200-0991 is a high-quality MAIN PCB A2 designed for integration into various technological systems, including CNC machines, robotics, and automated production lines. This component ensures stable operation, accurate motion control, and consistent performance across automated systems.

It is commonly integrated into CNC machines, robotics, and production lines where uptime, precision, and long-term reliability are essential. The A20B-8200-0991 belongs to the A20B-8200 product series, known for its reliability and quality.

Investing in this product ensures long-term functionality and enhances the overall efficiency of your system. Please note that availability may vary, so it is advised to contact the supplier for the most up-to-date information regarding stock availability.

Additionally, the core exchange is required for this product. This means that returning the original core of your previous PCB will be necessary to complete the exchange. At this time, repair services are not being offered for this particular product.

However, the expert team is continuously working on finding innovative solutions to provide repair services in the future. Investing in the A20B-8200-0991 - MAIN PCB A2 ensures that you are receiving

a high-quality product that meets industry standards and maximizes the performance of your system.

With its exceptional durability and compatibility, this MAIN PCB A2 is a reliable choice for anyone seeking a seamless and efficient technology solution.
