Ask about this product

Manufacturer	Fanuc
Catalog number	ic200mdd845c
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Manufacturer	Fanuc
Part Number	IC200MDD845C
Product Type	Mixed I/O Module
Number of Input Channels	16 channels
Number of Output Channels	8 channels
Input Voltage	24 VDC
Output Voltage Range	0-125 VDC, 0-265 VAC VDC, VAC
Backplane Current Draw	270 mA
LED Indicators	Individual channel LED indicators; OK LED

Description

The Fanuc IC200MDD845C is a versatile mixed I/O module from the VersaMax series, designed to integrate seamlessly into industrial automation systems. This module features 16 discrete inputs and 8 relay outputs, providing a total of 24 I/O points.

The inputs support positive logic wiring and accept a nominal signal voltage of 24 VDC, while the outputs are Form A relay contacts rated for 2.0 Amperes, capable of handling both DC and AC loads. The IC200MDD845C operates with an input voltage of 24 VDC and offers output voltage ranges of 0-125 VDC and 0-265 VAC, accommodating various industrial applications.

It draws a maximum of 270 mA from the backplane, ensuring efficient power consumption. The module is equipped with individual LED indicators for each input and output channel, facilitating real-time monitoring of system status.

Additionally, an 'OK' LED indicates continuous backplane power supply, enhancing operational reliability. This module is ideal for applications requiring a combination of discrete inputs and outputs in a compact and reliable form factor.
