

IC200MDL330

Industrial automation components

Manufacturer	Fanuc
Catalog number	ic200mdl330
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Product Type	Module
Relay Specifications	120 VAC
Voltage	120 V
Current	0.5 A
Signal Type	120
Signal Level	120 V

Description

The IC200MDL330 module from FANUC is an advanced solution designed for industrial applications. It operates at a voltage of 120V and a current of 0.5A, making it ideal for integration into automation systems. The module supports signal levels of 120, ensuring high precision and reliability in operation. The relay specification also stands at 120, further emphasizing its performance. With a robust design, the IC200MDL330 is suitable for a variety of industrial applications.
