

IC660EBA101

Industrial automation components

Manufacturer	Fanuc
Catalog number	ic660eba101
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Channel Configuration	6
Signal Type	115
Relay Specifications	115 VAC
Voltage	125 V
Signal Level	115 V

Description

The IC660EBA101 is a signal module that features a voltage of 125 and a channel configuration of 6. It offers a signal type, signal level, and relay specification, all at 115. This module is ideal for applications requiring flexibility and precise signal management in automation systems.
