Ask about this product

Manufacturer	Festo
Catalog number	vtux-a-p
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Brand	Festo
Part Number	VTUX-A-P-
Product Type	Valve Terminal
Flow Rate	670 L/min
Communication Protocols	AP-I, AP-A, Profinet, Ethernet IP, IO-Link
Design	Modular, Compact, Lightweight
Installation	Easy Installation, Space-Efficient
Modularity	Customizable, Scalable
Valve Positions	Up to 64

Description

The Festo VTUX-A-P- is a modular valve terminal designed to enhance flexibility and performance in industrial automation systems. It offers a high flow rate of up to 670 L/min, making it suitable for both centralized and decentralized machine concepts. The VTUX-A-P- supports various communication protocols, including AP-I, AP-A, Profinet, Ethernet IP, and IO-Link, ensuring seamless integration into existing systems. Its compact and lightweight design facilitates easy installation and efficient use of space. The terminal's modularity allows for customization and scalability, enabling adaptation to evolving machine requirements. Key features include a multi-pin plug connection, fieldbus interface CPX-AP-A, and the capability to handle up to 64 valve positions with serial communication. The VTUX-A-P- is ideal for applications requiring high performance, flexibility, and future-proof connectivity in automation processes.
