

### 33500904

Industrial automation components

<b>Manufacturer</b>	Heidenhain
<b>Catalog number</b>	335-009-04
<b>Category</b>	Industrial automation components
<b>Product type</b>	Industrial automation components
<b>Status</b>	Active product

### Technical specification

<b>Current</b>	67 A
<b>Signal Type</b>	400
<b>Signal Level</b>	400 V
<b>Voltage</b>	400 V
<b>Frequency</b>	50 - 60 Hz
<b>Product Type</b>	Drive
<b>Relay Specifications</b>	400 VAC

### Description

The Heidenhain 335009-04 is a high-performance inverter power supply module designed for industrial automation applications. Operating at a voltage of 400 V and a current of 67 A, it delivers a rated power of 45 kW, with a peak power of 80 kW for durations up to 0.2 seconds. The module supports a frequency range of 50 to 60 Hz, ensuring compatibility with various industrial power systems. Its internal heat removal system enhances reliability and longevity, while the compact design with a width of 200 mm facilitates easy integration into existing setups. This module is ideal for powering Heidenhain's UV 140 45 series drives, providing stable and efficient power for demanding automation tasks.
