

DEF1.1

Industrial automation components

Manufacturer	Indramat
Catalog number	def11
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Weight	0.09 kgs
Product Type	Interface Module
Dimensions	140 mm x 170 mm x 20 mm
Weight	0.12 kg
Manufacturer	Indramat
Compatibility	Indramat DDS 2.1 servo drives

Description

The Indramat DEF1.1 is an interface module designed for seamless integration within Indramat's automation systems. This module facilitates the exchange of binary signals between the drive and a programmable controller, ensuring precise control and monitoring of industrial processes. With its compact design, the DEF1.1 is suitable for applications where space efficiency is paramount. Key features include a robust construction that ensures durability in industrial environments and compatibility with various Indramat drive systems, making it a versatile choice for enhancing automation capabilities.
