

## FWA-ECODR3-FGP-01VRS-MS

Industrial automation components

<b>Manufacturer</b>	Indramat
<b>Catalog number</b>	fwa-ecodr3-fgp-01vrs-ms
<b>Category</b>	Industrial automation components
<b>Product type</b>	Industrial automation components
<b>Status</b>	Active product

### Technical specification

<b>Product Type</b>	Firmware Module
<b>Interface</b>	FIELDBUS
<b>Encoder Emulation</b>	Incremental and Absolute
<b>Display</b>	2-digit Numeric
<b>Power Rating</b>	24VDC

### Description

The Indramat FWA-ECODR3-FGP-01VRS-MS is a firmware module designed for Bosch Rexroth's DKC Drive Controllers, specifically within the DKC03 to DKC06 series. This module is tailored for the ECODR3 series with version code 01, providing support for linear asynchronous, synchronous, and asynchronous kit motors. It features a FIELDBUS interface and stores unalterable operating data digitally. The firmware supports both incremental and absolute encoder emulation, offers multilingual functionality, and includes an operating hour counter for power and control sections, along with a predefined error message system. The module is equipped with a 2-digit numeric display and operates at a power rating of 24VDC.
