

## FWA-ECODR3-SGP-03VRS-MS

Industrial automation components

<b>Manufacturer</b>	Indramat
<b>Catalog number</b>	fwa-ecodr3-sgp-03vrs-ms
<b>Category</b>	Industrial automation components
<b>Product type</b>	Industrial automation components
<b>Status</b>	Active product

### Technical specification

<b>Weight</b>	0.45 kgs
<b>Voltage</b>	24 V
<b>Product Type</b>	Module
<b>Signal Level</b>	24 V
<b>Signal Type</b>	24

### Description

The Indramat FWA-ECODR3-SGP-03VRS-MS is a firmware module designed for the ECODRIVE03 series of servo motion controllers by Bosch Rexroth Indramat. This firmware is tailored for general automation applications, providing versatile control solutions in industrial settings. It supports multiple communication interfaces, including SERCOS, analog, and parallel, ensuring compatibility with a wide range of automation systems. The firmware is installed on the ESM module of DKC drives, such as the DKCXX.3 series, facilitating seamless integration and operation. With a power rating of 24 V DC, it is suitable for various automation tasks requiring reliable and efficient control. The FWA-ECODR3-SGP-03VRS-MS firmware is part of the ECODR3 product family, reflecting its advanced capabilities and adaptability in diverse industrial applications.
