

TVD1.3-15-03

Industrial automation components

Manufacturer	Indramat
Catalog number	tvdl3-15-03
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Weight	14.97 kgs
Horsepower	7.5 KW
Refrigerant	r911268888
Relay Specifications	480 VAC
Voltage	380 - 480 V
Power	7.5 kW
Cooling Capacity	7.5 kW
Signal Type	480
Signal Level	480 V

Description

The Indramat TVD1.3-15-03 is a high-performance power supply module designed for industrial automation applications. Manufactured by Indramat, a renowned brand in the field, this module offers a continuous DC bus power of 15 kW and operates at a DC bus voltage of 320 V. It is engineered to convert three-phase AC input voltage ranging from 380 to 480 V into a stable DC output, ensuring reliable power delivery for various automation systems. The module features a compact design with dimensions of 150 x 390 x 325 mm and weighs approximately 11.2 kg, making it suitable for integration into standard industrial cabinets. Its robust construction and efficient performance make it an ideal choice for powering multiple drives and servos within a single system. The TVD1.3-15-03 is part of Indramat's TVD series, known for their reliability and high-quality standards in power supply solutions for industrial automation.
