| Manufacturer | Inny |
| Catalog number | 3hac17340-1 |
| Category | Industrial automation components |
| Product type | Industrial automation components |
| Status | Active product |

Technical specification

| | |
|---------------|------------------------------------|
| Power | 400 |
| Product Type | Motor |
| Power | 400 W |
| Motor Type | Servo Motor |
| Mounting Type | M18 Type B |
| Manufacturer | Inny |
| Part Number | 3HAC17340-1 |
| Category | Podzespoły automatyki przemysłowej |

Description

The Yaskawa 3HAC17340-1 is a high-performance servo motor designed for precision motion control applications. With a rated power output of 400W, this motor is part of Yaskawa's M18 Type B series, known for their reliability and efficiency in industrial automation systems. The 3HAC17340-1 is engineered to deliver precise torque and speed control, making it ideal for applications requiring high accuracy and responsiveness. Its robust construction ensures durability and consistent performance in demanding environments. This servo motor is compatible with Yaskawa's Sigma-7 series servo drives, offering seamless integration and enhanced control capabilities. Whether used in robotics, CNC machinery, or other automated systems, the 3HAC17340-1 provides the performance and reliability needed to optimize operational efficiency.
