Status	Active product

Technical specification

Product Type	Module

Description

The Hardy HI 1734-WS Point I/O Series Weight Processing Module is a plug-in module for Rockwell's Point I/O chassis, the fastest growing segment of Rockwell controllers. Designed exclusively for weight processing in POINT I/O products such as communication interface modules and terminal bases from Rockwell Automation, the HI 1734-WS enhances the productivity of manufacturing systems by digitally suppressing noise and dramatically reducing scale settling time.
