Ask about this product

Manufacturer	Keyence
Catalog number	cv-x150fp
Category	Industrial automation components
Product type	Industrial automation components
Status	Legacy / discontinued

Technical specification

Brand	Keyence
Part Number	CV-X150FP
Product Type	Image Sensor/Controller
Camera Support	2-megapixel megapixels
Image Processing	Advanced image processing capabilities
User Interface	User-friendly interface
Discontinued	Yes
Replacement Product	CV-X320F

Description

The Keyence CV-X150FP is an advanced image sensor/controller designed for high-performance machine vision applications. As part of the CV-X series, it offers intuitive operation and robust functionality, making it suitable for a wide range of industrial automation tasks.

Key features include support for 2-megapixel cameras, ensuring high-resolution image capture for precise inspection and analysis. The system is equipped with advanced image processing capabilities, enabling rapid and accurate defect detection.

Its user-friendly interface allows for easy setup and operation, reducing the learning curve for operators. The CV-X150FP is engineered for reliability and durability, meeting rigorous industrial standards to perform consistently in demanding environments.

Please note that this model has been discontinued, and the recommended replacement is the CV-X320F, which offers enhanced features and improved performance.
