### Description

The LENZE E84AVSCE5514SB0 inverter operates at a voltage of 500V and a power rating of 0.55 kW, designed for applications requiring precise control. The operating frequency is 599 Hz, ensuring optimal performance. Both the cooling efficiency and motor power are rated at 0.55 kW, making this product an ideal solution for various industrial applications. Additionally, the signal type and signal level are consistent at 500, providing stability and reliability.
