Product Marketing Description	PLC AnS Series Power supply module DC 24 V, output DC 5 V / 5 A (5)

Description

The Mitsubishi A1S63P is a power supply module designed for the MELSEC A Series programmable logic controllers (PLCs). Operating with a 24V DC input voltage, it provides a stable 5V DC output at a rated current of 5A, ensuring reliable power distribution within automation systems. This module is engineered for seamless integration into the MELSEC A Series, offering efficient power conversion and distribution. Its robust design and high-quality components contribute to the overall reliability and longevity of the automation system. The A1S63P is suitable for various industrial applications requiring consistent and efficient power supply solutions.
