Ask about this product

Manufacturer	Mitsubishi
Catalog number	m20-mam-am20
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Brand	Mitsubishi
Part Number	MAM-AM20
Product Type	Alarm Modem
Memory Capacity	2 MB (expandable up to 2 GB)
Network Compatibility	GSM/GPRS/EDGE
Housing Type	DIN rail housing
Operating Temperature Range	0–50°C
Power Supply	10–30 V DC

Description

The Mitsubishi MAM-AM20 is an advanced alarm modem designed for industrial automation systems, offering reliable remote monitoring and control capabilities. This device enables the transmission of alarm messages via SMS, fax, or email, ensuring prompt notification of service personnel in case of system anomalies.

It supports remote switching of PLC outputs and relay settings through SMS and email, facilitating efficient system management. Additionally, the MAM-AM20 functions as a data logger and includes an embedded web server with a database and machine file, enhancing data accessibility and analysis.

With a substantial non-volatile alarm memory of 2 MB, expandable up to 2 GB, it ensures comprehensive event logging. The modem operates over GSM/GPRS/EDGE networks, providing versatile connectivity options.
