

MTY16T

Industrial automation components

Manufacturer	Mitsubishi
Catalog number	mt-y16t
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Voltage	DC
Current	0.5 A
Channel Configuration	16
Product Type	Module

Description

The MITSUBISHI MTY16T module is an advanced device designed for use in automation systems. It features a DC voltage and a current of 0.5, making it an ideal solution for applications requiring precise control. With 16 channels, this module offers flexibility and efficiency in managing various signals. Its robust construction ensures reliability in challenging industrial environments.
