### Description

The NT3S-ST124B-E is an advanced HMI display from OMRON, designed for operation in demanding industrial environments. With a working voltage of 24V and a power rating of 3.5W, the device ensures reliable performance. It features a component specification of st124b and a cable specification of 192 × 64, providing excellent image quality. The signal type and signal level are both 24, making it an ideal solution for monitoring and controlling industrial processes.
