Manufacturer	Phoenix Contact
Catalog number	2893901
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Processor	Intel® Pentium® M 1.6 GHz
RAM	1 GB DDR
Storage	3.5" HDD, min. 160 GB (UDMA)
Expansion Slots	2x PCI/ISA shared, 1x PCI
Connectivity	2x Ethernet (10/100 Mbps), 4x USB, 1x RS-232, 1x LPT, 1x DVI (VGA)
Display	15" TFT, 1024 x 768 pixels, resistive touch screen
Dimensions	390 mm x 312 mm x 156 mm
Environmental Rating	IP65 front panel
Operating Temperature	5°C to 45°C

Description

The Phoenix Contact 2893901 is a high-performance Panel PC designed for industrial applications requiring robust computing capabilities. Featuring a 15-inch TFT display with a resolution of 1024 x 768 pixels, it integrates a resistive industrial touch screen for intuitive operation.

Powered by an Intel® Pentium® M processor running at 1.6 GHz and equipped with 1 GB DDR RAM, this device ensures efficient processing for demanding tasks. Storage is provided by a 3.5" HDD with a minimum capacity of 160 GB (UDMA), accommodating substantial data storage needs.

The system includes multiple expansion slots: two PCI/ISA shared slots and one PCI slot, allowing for versatile hardware integration. Connectivity options are extensive, featuring two Ethernet ports (10/100 Mbps), four USB ports, one RS-232 port, one LPT port, and one DVI (VGA) port, facilitating

seamless integration into various industrial networks and systems.

Designed to operate in challenging environments, the PPC 5315 PM boasts an IP65-rated front panel and an operating temperature range of 5°C to 45°C, ensuring durability and reliability in industrial settings.

Its compact dimensions of 390 mm x 312 mm x 156 mm make it suitable for installations with limited space. This Panel PC is ideal for applications such as machine control, process monitoring, and automation tasks, providing a reliable and efficient solution for industrial computing needs.
