

140CPU67160

Industrial automation components

Manufacturer	Schneider Electric
Catalog number	140cpu67160
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Frequency	266 MHZ
Memory/Storage	1024 KB
Interface Type	ethernet

Description

The 140CPU67160 module from Schneider Electric is an advanced controller with a frequency of 266 MHz and 1024 MB of memory, ensuring high performance in industrial applications. Equipped with an ethernet interface, it allows for easy integration with communication systems, making it an ideal solution for complex automation processes.
