### Description

The 170ADM35011 module from Schneider Electric is an advanced device designed for industrial applications. It features 16 digital inputs (DI) with a signal level of 24V, providing high flexibility for integration with various systems. The module has a configuration of 16, allowing for efficient signal management. Additionally, the relay specification is 5, enhancing its versatility in automation applications. With a current rating of 0.5A, this module is an ideal solution for demanding industrial environments.
