### Description

The TM200CE40R controller from Schneider Electric is an advanced device operating within a voltage range of 100 to 240 V and a frequency of 50-60 Hz. Equipped with an ethernet interface, it ensures efficient communication. The signal type and signal level are both 240, making it an ideal solution for demanding applications. The relay specification also stands at 240, highlighting its versatility and reliability in various industrial environments.
