| **Weight** | 0.5 kg |

## Description

The Schneider Electric XENTA-411 is a 10-channel digital input module designed for integration with TAC Xenta building automation controllers. This module enables the monitoring and counting of digital, dry contact signals, making it ideal for applications such as alarm monitoring, status indication, and pulse counting in HVAC and building automation systems.

Each input can function as a pulse counter, facilitating flow measurement and similar metering applications. The XENTA-411 is configured using the TAC Menta programming tool, ensuring seamless
