Description

The Sew-Eurodrive DFP21A is a Profibus communications card designed for seamless integration with Sew-Eurodrive's MOVIDRIVE® series. This interface module enables efficient communication between MOVIDRIVE® inverters and Profibus DP networks, facilitating rapid data exchange essential for industrial automation applications. The DFP21A supports a baud rate of 12 Mbaud, ensuring high-speed communication. It features a 9-pin D-SUB connection for reliable connectivity. This module is ideal for applications requiring precise control and monitoring of drive systems within a Profibus network.
